PROFESSIONAL SUMMARY

DevOps Engineer with 6 years of IT experience, including 3+ years in DevOps and 2.5 years in Cloud and Infrastructure support.

Hands-on experience in building CI/CD pipelines, containerization, Kubernetes deployments, and AWS cloud services. Strong experience in Jenkins, Docker, Kubernetes, and ArgoCD, with practical exposure through a self-managed Kubernetes homelab.

Skilled in monitoring, automation, and troubleshooting production environments, with a focus on reliability and performance optimization.

EXPERIENCE SUMMARY

- 6 years of IT experience across Cloud Infrastructure and DevOps
- 3+ years of hands-on DevOps experience
- Strong working knowledge of Kubernetes, Docker, Jenkins, ArgoCD, and AWS
- Experience with monitoring, observability, and container security
- Continuous learner with good troubleshooting and operational skills

TECHNICAL SKILLS

- **CI/CD & GitOps**
Jenkins, Git, GitHub, ArgoCD, Maven
- **Containers & Orchestration**
Docker, Kubernetes, Helm, HPA, Pod Scheduling
- **Cloud Platforms**
AWS (EC2, S3, VPC, IAM, EBS, RDS, CloudWatch)
- **Monitoring & Security**
Prometheus, Grafana, Trivy, OWASP Dependency Check, OWASP ZAP, SonarQube
- **Infrastructure & Automation**
Terraform, Ansible, Shell Scripting
- **Operating Systems & Tools**
Linux, Windows, macOS, ServiceNow

HANDS-ON PROJECTS (KUBERNETES HOMELAB)

Self Managed Kubernetes Homelab (Production-style setup)

- Built and managed a 3-node Kubernetes cluster on Proxmox
- Deployed containerized applications using Docker and Kubernetes manifests
- Practiced GitOps deployments using ArgoCD and Helm
- Configured Ingress NGINX, MetalLB, HPA, and resource limits
- Set up monitoring with Prometheus and Grafana
- Performed vulnerability scanning and basic performance optimization

PROFESSIONAL EXPERIENCE

DevOps Engineer | Fujitsu Consulting India Pvt Ltd | August 2022 - Present

- Built and maintained CI/CD pipelines using Jenkins, reducing manual deployment effort and improving release efficiency
- Configured Jenkins jobs, plugins, and automated build workflows
- Integrated SonarQube and Nexus for code quality and artifact management
- Containerized applications using Docker

- Deployed and monitored containerized applications on Kubernetes, ensuring high availability and efficient resource utilization
- Implemented GitOps-based deployments using ArgoCD for automated and consistent application delivery
- Implemented monitoring and alerting using Prometheus and Grafana to improve system observability and issue detection
- Worked with AWS services including EC2, S3, EBS, and VPC
- Supported Linux and Windows environments
- Used ServiceNow for ticket tracking and operational support

Cloud Infrastructure Support | Fujitsu Consulting India Pvt Ltd | February 2020 - July 2022

- Managed cloud infrastructure as Cloud Administrator, handling server scaling, storage, and network configurations based on client requests.
- Executed Linux terminal operations, updated logs in ServiceNow, and coordinated via Slack for approvals.
- Ensured smooth cloud operations by modifying instances, ports, and storage while adhering to client requirements.
- Performed bi-weekly log retrieval from servers, ensuring timely storage in the client share path.
- Managed DEX routing and deletion tasks, ensuring proper network traffic flow and removing outdated routes.
- Configured VRF routing, interfaces, and BGP neighbor IPs as per client requests.
- Performed VRF deletions and additions, ensuring seamless BGP peering and stable network connectivity.
- Performed monthly Windows server reboots on planned maintenance days.
- Prepared monthly reports covering Incident, Problem, and Change Management.
- Assisted the backup team in troubleshooting NetBackup issues on Windows servers hosted in a cloud environment, ensuring smooth backup operations.
- Worked on ServiceNow for handling Incident Management, Change Management, and Problem Management following ITIL v3.
- Shared and prepared weekly and monthly SLA reports for Japanese clients.
- Provided (24/7/365) support for client servers, including alert monitoring via Fujitsu System Walker Centric Manager and Salesforce-based monitoring.
- Communicated with Japanese client counterparts (Level-2) regarding server failures and P1/P2 alerts via calls, chat, and emails.

CERTIFICATIONS

- Japanese-Language Proficiency Test Certificate in Q4

EDUCATION

- Bachelor of Engineering (B.E) in Electrical and Electronics - Madha Engineering College
